

PRODUCT GUIDE

Oakmed Labels Explained

Please use this chart to help you identify individual products within the Oakmed range.

- All Oakmed products are colour coded and have a colour coded logo.
- You will see these colours and logos throughout our labelling, product guides, marketing and website.
- Some of the labels may have two colours if they come into two categories, eg. Soft Convex[®]/Alginate.
- All stock sent into hospitals are half stock boxes and state that on the label.

NB. Your Oakmed Representative is happy to check Oakmed stock for you when they visit.

All our bags are one piece

New For 2022

Look out for

In our latest product development, we have updated our drainable range with our unique anatomical shape and a new smooth tab on our soft closure. Designed with patients and Healthcare Professionals to increase comfortable wear time.

Primo - Page 5
Soft Convex[®] - Page 8
Alginate - Page 18

New Alginate Wafers

Our healing Alginate wafers are now available in our Soft Convex and Low Profile Soft Convex, closed and drainable ranges.

Pages 18-20

Slim Seals

Page 42

New to our Seals range, Slim Seals are a cost effective way to manage a difficult stoma.

Urostomy

Pages 21 - 30

NEW Tap closure now available across our range.

The new 'Twist and safe' tap closure doubles our options range of Urostomy bags, giving your patients even more choice.

All our Hydrocolloid and Soft Convex bags are also available in our Clinic/Community packs - see page 29 for more details.

Contents

Primo®

The perfect Hydrocolloid tapered edge for outstanding adhesion and security.

Page 5

Alginate

An adhesive which contains Alginate. Promotes skin integrity, absorbs moisture, and helps to heal sore skin.

Page 18

Hydrocolloid

A soft, flexible, hypoallergenic adhesive.

Page 33

Soft Convex®

7mm convexity.
Available in tapered edge Hydrocolloid and Alginate adhesives. Also high output.

Page 8

Urostomy

Available in tap and soft bung with Hydrocolloid, Microskin, Soft Convex and Low Profile Soft Convex adhesives.

Page 21

Wound Care

Wound and fistula drainage appliances in a range of sizes.

Page 36

Low Profile Soft Convex®

3.5mm convexity.
Available in tapered edge Hydrocolloid and Alginate adhesives.

Page 12

Microskin®

The lightest, thinnest and most flexible wafer available.

Page 31

Accessories

A comprehensive range of stoma and related accessories.

Page 40

PRIMO®

Designed by patients and Healthcare Professionals, the unique features and benefits of our Primo® bags offer you the perfect fit with outstanding adhesion and assured security.

These features are integral to both our drainable and closed bags.

- Oakmed's Hydrocolloid has a long term reputation for minimal reports of any skin reactions, audited to ISO 9001:2015 by SGS.
- Anatomically shaped.
- Infinitely superior, high tack adhesion.
- Leaves little or no residue when removed.
- Unique tapered edge, integral border.
- Hypoallergenic, non-irritant Hydrocolloid.
- Large adhesive area even when cut to maximum.
- Carbon filters designed individually for closed and drainable bag requirements.
- Improved soft touch closure on drainable bags.
- Soft non-cling fabric cover with viewing window.

**Our most popular range with mini, midi, standard and maxi sizes available.
Soft touch, easy to use closure on drainable bags.**

The perfect fit with outstanding adhesion.

7mm convexity

Naturally the flexible choice for maximum security and added confidence, our Soft Convex® range of bags fit the contours of your body for more comfortable wear. In both drainable and closed, tapered edge Hydrocolloid and healing Alginate adhesives, our range also offers a high output bag.

Unique features:

- 7mm depth of convexity.
- Maintains its convexity whilst in use.
- A comprehensive range of cut to fit and pre-cut sizes.
- High tack adhesion for advanced performance.
- Skin friendly design, hypoallergenic adhesives.
- Efficient odour eliminating filter system.

NEW FOR 2022

Unique anatomical shape now on both closed and drainable bags.
Soft touch, easy to use closure on drainable bags.

Bioactive skin healing

Our Alginate wafer is one of our superior skin protectors, offering both preventative and curative properties. Available in a wide range of sizes in both drainable and closed bags.

Used in woundcare for many years. Alginates are:

- Healing.
- Absorbent.
- Anti-bacterial.
- Haemostatic.
- Used without any accessories for a cost effective way to manage problematic skin.

Application for use are:

- Skin prone to allergies.
- Sore, excoriated peri-stomal skin.
- Moist bleeding, peri-stomal skin.
- Ulcerated peri-stomal skin.
- Muco-cutaneous separation.
- Stomas which produce excessive mucous.
- Infected peri-stomal suture sites.
- Alginate adhesive can readily be used on non-problematic skin to prevent complications occurring.

Oakmed Alginate adhesives contain not just a trace element but **15%** Alginate, this is significant enough to promote healing.

With **15% Alginate**, stimulates healing for sore skin.

Starter Pack

Clinic/community

Clinic/Community starter packs in all cut to fit Urostomy products

We have a full range of clinic starter packs available in both new 'Twist and Safe' tap and soft bung closure options.

Ideal to help Urostomists choose the right bag for their needs. Healthcare Professionals can rest assured that the pack contains everything the patient needs to trial our bag options. Full instructions for use are included to provide guidance on how to use the connector with the night drainage bag.

Please see over the page for the options we offer.

Pack contains:

- 5 x Bags of chosen product
- 1 x Night drainage bag
- 2 x Connectors
- 1 x Belt
- 1 x IFU
- 1 x Product code information sheet

Ask your Oakmed Territory Manager for more details.

Please contact our customer service department on **0800 592 786** if you have any questions or need any help at all regarding this or any other Oakmed products.

micro skin®

Unique to Oakmed, the Microskin® adhesive is thin, transparent and flexible, moulding easily to all body contours and creases, significantly reducing the risk of leakage.

Unique features:

- Transparent, thin and flexible design.
- Moulds easily and comfortably to body contours.
- Barely visible on skin when in place.
- Breathable and moisture vapour permeable for healthier skin.
- Durable for extended wear time.

Microskin

Transparent and flexible, Microskin® is the ideal wafer for active people.

Transparent and flexible, reduces the risk of leakage.
