# OAKMED LABELS EXPLAINED

Please use this chart to help you identify individual products within the Oakmed range.

- All Oakmed products are colour coded and have a colour coded logo.
- You will see these colours and logos throughout our labelling, product guides, marketing and website.
- Some of the labels may have two colours if they come into two categories, e.g. Soft Convex®/Alginate.
- All stock sent into hospitals are half stock boxes and state that on the label.

NB. Your Oakmed representative is happy to check Oakmed stock for you when they visit.

# PRIMO®

**Designed by patients and Healthcare Professionals, the unique features and benefits of our Primo® bags offer you the perfect fit with outstanding adhesion and assured security.**

These features are integral to both our drainable and closed bags.

- Oakmed's Hydrocolloid has a long term reputation for minimal reports of any skin reactions, audited to ISO 9001:2015 by SGS.
- Anatomically shaped.
- Infinitely superior, high tack adhesion.
- Leaves little or no residue when removed.
- Unique tapered edge, integral border.
- Hypo-allergenic, non-irritant Hydrocolloid.
- Large adhesive area even when cut to maximum.
- Carbon filters designed individually for closed and drainable bag requirements.
- Improved soft touch closure on drainable bags.
- Soft non-cling fabric cover with viewing window.

## NEW FOR 2018/2019

Extended range with mini, standard and maxi sizes available.
Soft touch, easy to use closure on drainable bags.

PRIMO® HYDROCOLLOID

The perfect fit with outstanding adhesion.

## Closed Mini Hydrocolloid Primo

**HP11C10 - HP11C50** Window, opaque, filter, soft cover both sides.

# microskin®

**Unique to Oakmed, the Microskin® adhesive is thin, transparent and flexible, moulding easily to all body contours and creases, significantly reducing the risk of leakage.**

Unique features:

- Transparent, thin and flexible design.
- Moulds easily and comfortably to body contours.
- Barely visible on skin when in place.
- Breathable and moisture vapour permeable for healthier skin.
- Durable for extended wear time.

microskin®

Transparent and flexible, reduces the risk of leakage.

# biform®

**Bi Form® combines the benefits of both Microskin® and Hydrocolloid adhesives. The Hydrocolloid protects the peri-stomal skin while Microskin, by conforming to the skin's natural folds and creases, gives added security against leaks.**

Unique features:

- Hydrocolloid protects the peri-stomal skin.
- Ideal for inserting stents in post-operative period.
- Eliminates the need for flange extenders which reduces cost.
- Ideal combination of healthy skin and flexibility.

biform® HYDROCOLLOID micro skin®

Benefit from healing Hydrocolloid and flexible Microskin.
